

Refining and Recycling Services

At **Cookson Industrial**, we've been refining and recycling precious metals since 1845. From our Birmingham refinery, we process industrial scrap containing gold, silver, platinum, palladium and copper — ensuring maximum recovery, transparency and value. Whether you're in manufacturing, electronics, automotive, aerospace or healthcare, our certified service turns your scrap into profit.

Why choose Cookson for Scrap?

- Over 175 years of trusted precious metal refining
- Certified waste management and full compliance
- Maximum recovery, minimum waste
- Secure and transparent service from collection to settlement
- European network – fast turnaround, competitive returns

Applications

- Manufacturing
- Aerospace
- Healthcare
- Industrial

What We Recycle

- Metalworking scrap – stamping waste, shavings, offcuts
- Electroplating residues – filters, sludges, resins
- Ceramic & organic residues – pastes, wipes, polishing cloths
- Process solutions & baths – precious metal finishing

We make metal recycling straightforward with full traceability, expert analysis and flexible settlement options every step of the way.

Our Simple Scrap Process

- Collection & Logistics – secure containers and certified drivers
- Inspection & Weighing – all materials logged and tracked
- Processing & Sampling – homogenised for testing
- Analysis – accredited labs, precise results
- Settlement & Payment – flexible options to suit you

Settlement Options

- Credit to your precious metals account
- Return as refined products
- Direct bank payment
